Millésime 2006 - Grand Cru

Champagne Grand cru, Empreinte d'une vendange - Brut - Blanc, Sparkling Wine 2006

This is the Champagne for special occasions, to share with a few privileged enthusiasts, the palate clean and free of any other food. Perfect now, it will age beautifully to provide a rich, succulent wine.

THE WINE

Picked by hand, with selective screening on the bunch. Half Pinot Noir for its personality, its roundness and the typical terroir character and half Chardonnay for its freshness and particularly its lasting properties. The selection is made as a priority from low-yield vines to achieve an accurate regional quality. Dosage: 6 grams per litre.

THE VINTAGE

A relatively mild winter and successive summer temperatures and thunderstorms throughout the flowering to mark finally the dry harvest vintage. We took the risk to start the harvest while other viticulturists had finish, to reach full maturity. This year is considered "average" for the uninitiated, however with this late picking, it promised a rich and complex wine since birth.

SITUATION

Grand Cru from terroirs of BOUZY, AMBONNAY et LOUVOIS

TERROIR

Bouzy is a village of Grande Montagne de Reims, especially of the "Côte des Noirs (Coast of Blacks)" because stronghold of Pinot Noir.

On its slopes, vine grows on soils consist of fragments of millstones, pebbles and sand mixed with clays of decalcification of millstones, resulting of runoff. Silts of the plate cover by a fertile coat the tops of hills, and old alluvium formed of sand, gravel and chalk pebbles.

It is well suited to the Champagne wine. Usually light in color, it provides in the day in favor of the vine a good reflection of the warmth and light. Rather thin, it is conducive to quality

The basement is chalk bélemnites upper Santonian (Campanian) and chalk micrasters Lower Senonian of the Marne.

Deposed by the seas of the end of the Mesozoic era, there was a few hundred million years the chalk of Cretaceous is to 200 meters deep. It absorbs heat and return it. She did the same with water to regulate the absorption by vines that plunges its roots up to 3-4 meters deep.
