# DOMAINE ROGER BELLAND

AOP Maranges Premier Cru Les Clos Roussots  
Red

## PRESENTATION

Domaine Roger Belland, founded in 1839, is located in the heart of the village of Santenay, in the south of the Côte de Beaune. Roger Belland and his daughter Julie represent the fifth and sixth generations of Domaine Belland. Passionate about exceptional wines, they cultivate 23 hectares of vines, located on the finest terroirs of the 1st and grand crus of the villages of Maranges, Santenay, Chassagne Montrachet, Puligny Montrachet, Meursault, Volnay and Pommard. The domaine's viticulture is sustainable and respectful of the environment.

## VARIETAL

Pinot Noir 100%

## LOCATION

Two plots located in Clos Roussot, south of the Montagne des Trois Croix.  
Age of vines: 50 à 70 years old

## TERROIR

Deep, clay-rich soils.

## IN THE VINEYARD

Guyot pruning with very early debudding and leaf removal (at the floral cap fall stage).

## HARVEST

100% manual harvest with rigorous sorting directly in the vineyard.

## WINEMAKING

The grapes are 100% destemmed and placed into a temperature-controlled stainless steel vat. Cold maceration lasts 6 to 8 days with gentle pump-overs to stimulate yeast development. Alcoholic fermentation begins after about a week, under controlled temperatures (between 14°C and 18°C). Once all sugars are consumed, the maceration ends with a warm phase to stabilize color and soften the tannins.

## AGEING

After 3 to 4 weeks of maceration, the wine is racked into barrels for 10 months of ageing, including 20% new oak. Malolactic fermentation occurs during barrel ageing.

## SERVING

14 to 16°C

## AGEING POTENTIAL

3 to 5 years

## TASTING

Aromas of blackberry and fig, a structured wine with fine tannins and a finish that is lightly spiced and smoky.

## FOOD PAIRINGS

Roast poultry and cheeses.

## PRODUCTION VOLUME

4 500
