Sustainable grape varieties reduce the use of pesticides. They help preserving biodiversity and soil health. Fewer chemicals also mean less pollution of the air, water and surrounding ecosystems. Sustainable grape varieties are also resilient, they are adapted to climate change conditions, making them more resistant to heat and period of drought.

PRESENTATION

Floréal is a cross between Sauvignon and Chardonnay. Union of the two major white varietal grapes in the world, Floréal reaches a balance that is really difficult to obtain by just blending the wines of its two "parents".

LOCATION

Harvested in the heart of Languedoc.

IN THE VINEYARD

We cultivate our Floreal in compliance with High Environmental Value (HVE3) specifications : low use of chemicals, respect of the biodiversity and control of water usage.

WINEMAKING

The harvest is picked early in the morning, when temperatures are coolest. As soon as it arrives at the cellars, it is inerted with carbon dioxide and taken directly to the press, with the aim to avoid oxidation and preserve aromas.
