

GEWURZTRAMINER Vendange Tardive 2006

AOC Alsace, Alsace, France

THE VINTAGE

From mid-December through to the middle of March temperatures remained close to zero. Winter came to a dramatic end in March with a dump of 60 cm of snow – something not seen since 1954. Easter was damp and cold and Spring finally arrived in the middle of April. Under good conditions in May, the vines pushed forth well. The June weather allowed for a successful flowering which was finished by the 23rd. July was extremely hot (36°C) and dry. Some areas suffered from the dry spell but the rain arrived at the beginning of August and fell intermittently through the month (133 mm). Thanks to the biodynamic cultivation of Josmeyer's vines, they survived well despite these climatic variations and the grapes reached good maturity in time for the planned harvest on 18th September. Less fortunately heavy rain fell on the 17th (28 mm) followed by another downpour on the 24th (21 mm) and again on 2nd October (65 mm in 2 days) which made it a singularly complicated harvest and meant that a fairly severe selection of the grapes was required to adhere to the high standards set out by the domain.

TERROIR

Between Wintzenheim and Turckheim these flat alluvial deposits of the Fecht are rich in clay (22%). The soil is predominantly of sand, shingle, and silt with a high incidence of pebbles and frequent plates of loess. From this vineyard come wines which are soft and sensual.

WINEMAKING

The grapes were hand picked and whole-bunch pressed very slowly and gently in pneumatic presses over 5-8 hours to give a clean must and a beneficial amount of skin contact. Transferred to thermoregulated stainless steel tanks the juice then began a natural fermentation using only its own natural yeast which lasted for one month. The fermentation was initially temperature controlled but was eventually allowed to proceed at its own pace to allow the wine to develop its own character and complexity. The wine stabilized in stainless steel tanks naturally during the winter season and, following a very gentle filtering, was bottled in March 2007 before the heat of summer to preserve the natural carbonic gas (a natural antioxidant). Malolactic fermentation is always avoided at Josmeyer and no chaptalization takes place.

VARIETAL

Gewürztraminer

13,5 % VOL.

TECHNICAL DATA

Yield: 30 hL/ha

Age of vines: 40 years old

Residual Sugar: 74 g/l

Tartaric acidity: 4,9 g/l

TASTING

The nose is complex with notes of citrus peel, caramel and apricot. A well balanced palate, smooth and fine. A superb "vendange tardive". 16/20 Bettane & Desseauve 2009

FOOD PAIRINGS

Mousse of exotic fruits, ginger cake, Christmas cookies, orange savarin.
