La Vicomté, Sélection Bourgogne, Grenache Rosé, IGP Pays d'Oc, Rosé, 2025

IGP Pays d'Oc, France

Located in the heart of the world's largest wine-producing region, the vineyards of the Vicomté winegrowers cover more than 7,500 hectares. They grow on hilly terrain fed by sediments of the Hérault River, but also on more calcareous soils such as the Villefranchian terraces and semi-slopes. Benefiting from a Mediterranean climate, dry and arid in summer and mild in winter, we harvest the finest grape varieties under HVE3 charter.

PRESENTATION

The Cinsault grape variety, has a long and fascinating history. Its origins can be traced back to the southern region of France, specifically in the Languedoc-Roussillon area. Cinsault is believed to have been cultivated there for several centuries, with records dating back to the 16th century.

LOCATION

In the heart of the Languedoc area.

TERROIR

Cinsault's adaptability and resilience made it a favored grape variety in warm and arid climates. Its ability to withstand heat, drought, and various soil types contributed to its widespread cultivation in regions such as the Mediterranean basin.

IN THE VINEYARD

Cinsault grape berry is known for its attractive dark blue-black color, medium size, and thin skin. These characteristics contribute to the unique flavors and qualities that Cinsault imparts to the wines it produces.

HARVEST
