

# DOUCE NATURE

## Douce Nature, Pinot Noir, Vin de France, Rouge, 2024 Vin de France, VSIG, France

### PRESENTATION

Douce Nature is a range of organic wines labeled as Vin de France, crafted as single varietals to faithfully express the character of each grape. Every cuvée pays tribute to biodiversity, the balance of the terroirs, and the living ecosystems that surround them. These wines are made with the utmost respect for our vineyards and our "sweet Mother Nature."

### TERROIR

This Pinot Noir is grown in France on clay-limestone soils, characterized by their ability to retain water. The climate is hot with maritime influences. This wine is organically grown (pesticides and chemical products are strictly forbidden in the vineyards) and is certified by ECOCERT.

### WINEMAKING

After total destemming, vinification takes place partly in traditional concrete vats and partly in stainless steel vats, with a long vatting period of 2 to 3 weeks. Part of the ageing is then carried out in concrete vats and the other in contact with wood with temperature control during the summer.

### VARIETAL

Pinot Noir

### TASTING

A lovely light crimson, this wine is round and velvety, with expressive aromas of raspberry, blueberry and a hint of oak. Fresh, elegant and well-balanced, it finishes on spicy tannins and a touch of sweetness.

### FOOD PAIRINGS

Serve chilled as an aperitif, or with grilled vegetables or light cheeses.
