

CHAMPAGNE

Champagne Salon 1955

THE VINTAGE

Frosts in May over all Champagne affected 1500 hectares in the Marne, whereof 400 to 500 were completely destroyed. Flowering got off to a slow start, before picking up speed and completing in a few days. Fruit set of rare perfection. Underway in the majority of communes at the beginning of October, the harvest revealed an excellent health status. Good quality.
