TERROIR

The terroir shows terraces faced to south between 100-250 metres of altitude and soil-sandy garnitic.

WINEMAKING

Fermentation of the alcohol takes place in stainless steel vats, at a controlled temperature of 18°C; when fully fermented, all the wines are decanted to separate the dregs, followed by the "coupage" of the various vats. The wine is then stabilized by applying cold, filtered and bottled, after passing through a microbe-free filter process to ensure that the wine is preserved in the bottle in perfect condition.

TASTING

Bright scents of green apple deepen to green olive in this robust wine. There's tension in the mineral finish, with a pleasantly abrasive edge.
